Our Transitional Care rooms are private suites, designed for the comfort of our patients.

The Transitional Care Program is an excellent option for patients when additional skilled nursing care is needed on the road to recovery.

Our Transitional Care Program specializes in top results, providing the extra time and wide range of services you need to recover and improve your health and independence, including:

- Recovery from major surgery, joint replacement, vascular or abdominal procedures
- Recovery after a major accident or stroke
- Management of pain
- Wound care
- IV therapy
- Physical, occupational and/or speech therapy after a prolonged illness

We believe in continuity of care and improving outcomes. Let us help you restore health, strength and mobility.

Aultman Orrville Hospital's Transitional Care Program leads with quality outcomes. Our outstanding care is rated better than many state and national quality standards.

Benefits of our program include:

- Hospitalist-lead care team
- Direct nursing care with lower nurse-to-patient ratios than a traditional skilled nursing facility (SNF)
- Rehabilitation services, such as physical, occupational and speech therapy
- Availability of support services in-house including radiology, laboratory services, respiratory therapy, dietitian and pharmacists
- On-site Emergency Department if an acute condition change arises
- Ease of access to facility

Amenities

Aultman Orrville provides private, comfortable rooms. Each spacious room has its own bathroom, cable TV and Wi-Fi. Upon request, rooms with accommodations can be coordinated for a support person to stay overnight. Visitation is unrestricted. A chaplain is available. Meals are prepared in-house.
